Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a first action on the merits of application serial no. 10/531,341 filed on April 15, 2005.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement filed on April 15, 2005 has been considered.

Specification

The disclosure is objected to because of the following informalities:

-On page 3, line 11 of paragraph [021] "lever" has been misspelled.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 10029497A1 in view of Newbigging ('893). DE discloses an electro-pneumatic switching unit having one splitter group transmission (12) pneumatically switched via a first set of valves (36, 38), one range change group transmission (14) pneumatically

switched via a second set of valves (44, 46) which can be manually preselected by a vehicle driver on a gear lever (16), one locking device (54, 56) for mechanically preventing the manually switching of illegal speed increasing ratios and one device (30, 42, 64) for preventing manual shifts wherein the locking device (Figure 6) is pneumatically connected to the first valve (44) and provides a slow switching position.

DE does not disclose the device (30, 42 and 64) preventing pneumatic switching of the transmission to inadmissible ratios.

Newbigging discloses a transmission wherein a blocking arrangement is used to prevent pneumatic downshift switching (column 7, line 45) of the range transmission.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to provide DE with a blocking arrangement in view of Newbigging to provide a backup to the locking device of DE to avoid damaging engine and clutch at high speeds.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

-Walker ('787) and Mason et al ('473).
